WARNING

Be safe! Do not use Gates belts, pulleys or sprockets on any aircraft propellor or rotor drive systems or in-flight accessory drives. Those Gates products are not designed or intended for aircraft use.

CAUTION

Use Gates products only on applications specified in Gates literature. Install and maintain products according to the vehicle manufacturer's recommended procedures and with recommended tools. Failure to follow these instructions could result in injury or property damage. Gates disclaims all liability due to failure to follow these instructions.

Limited Warranty for the Life of the Merchandise

Merchandise is warranted to be free from defects in materials or workmanship for the life of the merchandise. Damages from misuse, abuse or gradual wear from normal use are excluded from this warranty. Gates Corporation will, at its option, replace or repair any merchandise proved defective in material or workmanship, or both, during the warranty period. This is the exclusive remedy. For warranty service, please contact Gates Corporation, 1551 Wewatta St. Denver, Colorado 80202. THERE IS NO OTHER EXPRESS WARRANTY. IMPLIED WARRANTIES, INCLUDING THOSE OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE EXPRESS WARRANTY PERIOD. LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES UNDER ANY AND ALL WARRANTIES ARE EXCLUDED TO THE EXTENT EXCLUSION IS PERMITTED BY LAW.

Some states do not allow the exclusion or limitation of incidental or consequential damages, and some states do not allow limitations on how long an implied warranty lasts, so the above limitation and exclusion may not apply to you.

- ② Two Required.

③ Three Required.

④ Four Required.

⑤ Five Required.

⑥ Six Required.

▲ Durion® Silicone Hose Recommended.

✱ Use Notched Belt Only.

≡ Cut To Fit.

✦ Green Stripe® 4-Ply Coolant Hose Recommended.

✦ Use Wire Inserted Green Stripe® Coolant Hose.

✦ PowerBand® Belt May Work, Use Template To Check.

▲ Standard Belt Also Available. See Inside Back Cover.

② Two Required.

③ Three Required.

④ Four Required.

⑤ Five Required.

⑥ Six Required.

▲ Durion® Silicone Hose Recommended.

✦ Use Notched Belt Only.

≠ Cut To Fit.

✦ Green Stripe® 4-Ply Coolant Hose Recommended.

✦ Use Wire Inserted Green Stripe® Coolant Hose.

✦ PowerBand® Belt May Work, Use Template To Check.

▲ Standard Belt Also Available. See Inside Back Cover.

② Two Required.

③ Three Required.

④ Four Required.

⑤ Five Required.

⑥ Six Required.

▲ Durion® Silicone Hose Recommended.

✦ Use Notched Belt Only.

≧ Cut To Fit.

❖ Green Stripe® 4-Ply Coolant Hose Recommended.

◆ Use Wire Inserted Green Stripe® Coolant Hose.

✦ PowerBand® Belt May Work, Use Template To Check.

▲ Standard Belt Also Available. See Inside Back Cover.

② Two Required.

③ Three Required.

④ Four Required.

⑤ Five Required.

⑥ Six Required.

▲ Durion® Silicone Hose Recommended.

✦ Use Notched Belt Only.

≡ Cut To Fit.

✦ Green Stripe® 4-Ply Coolant Hose Recommended.

✦ Use Wire Inserted Green Stripe® Coolant Hose.

✦ PowerBand® Belt May Work, Use Template To Check.

▲ Standard Belt Also Available. See Inside Back Cover.

- ② Two Required.

③ Three Required.

④ Four Required.

⑤ Five Required.

⑥ Six Required.

▲ Durion® Silicone Hose Recommended.

✦ Use Notched Belt Only.

> Cut To Fit.

✦ Green Stripe® 4-Ply Coolant Hose Recommended.

✦ Use Wire Inserted Green Stripe® Coolant Hose.

✦ PowerBand® Belt May Work, Use Template To Check.

▲ Standard Belt Also Available. See Inside Back Cover.

- ② Two Required.
- ③ Three Required.
- ④ Four Required.
- ⑤ Five Required.
- ⑥ Six Required.
- ♠ Durion® Silicone Hose Recommended.
- ♣ Use Notched Belt Only.
- > Cut To Fit.
- ♣ Green Stripe® 4-Ply Coolant Hose Recommended.
- ♣ Use Wire Inserted Green Stripe® Coolant Hose.
- ♣ PowerBand® Belt May Work, Use Template To Check.
- ♣ Standard Belt Also Available. See Inside Back Cover.

- ② Two Required.

③ Three Required.

④ Four Required.

⑤ Five Required.

⑥ Six Required.

▲ Durion® Silicone Hose Recommended.

✦ Use Notched Belt Only.

≈ Cut To Fit.

◆ Green Stripe® 4-Ply Coolant Hose Recommended.

◆ Use Wire Inserted Green Stripe® Coolant Hose.

◆ PowerBand® Belt May Work, Use Template To Check.

◆ Standard Belt Also Available. See Inside Back Cover.

② Two Required.

③ Three Required.

④ Four Required.

⑤ Five Required.

⑥ Six Required.

▲ Durion® Silicone Hose Recommended.

✦ Use Notched Belt Only.

≡ Cut To Fit.

✦ Green Stripe® 4-Ply Coolant Hose Recommended.

✦ Use Wire Inserted Green Stripe® Coolant Hose.

✦ PowerBand® Belt May Work, Use Template To Check.

▲ Standard Belt Also Available. See Inside Back Cover.

② Two Required.

③ Three Required.

④ Four Required.

⑤ Five Required.

⑥ Six Required.

▲ Durion® Silicone Hose Recommended.

✦ Use Notched Belt Only.

≡ Cut To Fit.

❖ Green Stripe® 4-Ply Coolant Hose Recommended.

❖ Use Wire Inserted Green Stripe® Coolant Hose.

❖ PowerBand® Belt May Work, Use Template To Check.

▲ Standard Belt Also Available. See Inside Back Cover.

Green Stripe® Truck & Bus V-Belts Listed by Number

Showing Gates Belt Numbers with Corresponding Nominal Outside Lengths, Top Widths and Angles

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with
"Vertical Flats"

Green Stripe® Truck & Bus V-Belts Listed by Width and Length

Showing Nominal Belt Top Widths, Outside Lengths and Angles with Corresponding Gates Belt Numbers

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Green Stripe® Truck & Bus PowerBand® Belts Listed by Number

Showing Gates Belt Numbers with
Corresponding Nominal Outside Lengths,
Top Widths and Template Color

IMPORTANT: When using PowerBand® belts, make sure that ALL pulleys within the drive can use a PowerBand® by using the appropriate PowerBand® belt template. The use of the correct template is essential for proper fit. The appropriate template for each belt can be determined from the size list below. Refer to the product page in the front of this catalog for detailed instructions on correct fit of the templates in the pulley grooves. The lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt.

XL® Belts

Listed by Number

Showing Gates Belt Numbers with Corresponding Nominal Outside Lengths, Top Widths and Angles

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with
"Vertical Flats"

XL® Belts

Listed by Width and Length

Showing Nominal Belt Top Widths, Outside Lengths and Angles with Corresponding Gates Belt Numbers

IMPORTANT: Lengths shown (O.C. is Outside Circumference) are obtained by measuring around the outside of the belt. These lengths will not agree exactly with the size significant belt numbering system which is based on the effective length of the belt. Effective length ("engineered" length) cannot be measured in the field because special tools are required.

Automotive Top Widths are the standard sizes defined by the automotive belt industry (SAE J636). Due to manufacturing processes that create "Vertical Flats", the top width of XL and Truck/Bus series V-Belts will not agree with the printed top width dimensions. Top width on this page and on the belt sleeve refers to the pulley groove width and not the actual top width of these belts. A picture of a V-Belt with "Vertical Flats" is shown below. Actual top width of like belt sizes will also vary slightly depending on the manufacturer and belt style.

Competitive V-Belt

Our V-Belts with
"Vertical Flats"

Hi-Power® II Belts Listed by Number

Showing Hi-Power® II Belts with Corresponding Top Widths and Outside Lengths

PLEASE NOTE: V-Belt drives which use the belt as a clutch requires special consideration because the heat generated by belt slip (during engagement and disengagement) on some clutching applications can cause the V-Belt tensile materials in the belts listed below to shrink in length. The shrinkage may cause a belt, which is already engaged and driving, to not de-clutch, or a de-clutched belt may engage itself and start driving the machine unexpectedly. Depending on the machine and circumstances, either situation could prove dangerous to the machine operator or bystanders.

Belts especially designed to minimize or eliminate heat shrinkage may be required.

IMPORTANT: The outside length is determined by placing a steel tape around the outside of the belt. This method should be used because it is the one most commonly used by Dealers and Jobbers when measuring a belt.

Hi-Power® II PowerBand® Belts

Listed by Number - Size

Key to Size Numbering System

The part number is constructed by placing the number of strands required followed by a slash in front of the size.

In the example above **2/** is the number of strands, **A48** is the belt size.

Gates Belt No.	Nominal Outside Length (inches)	Gates Belt No.	Nominal Outside Length (inches)	Gates Belt No.	Nominal Outside Length (inches)

Super HC® Belts Listed by Number

Showing Super HC® & Super HC® Molded Notch Belts With Corresponding Top Widths and Outside Lengths

IMPORTANT: The outside length is determined by placing a steel tape around the outside of the belt. This method should be used because it is the one most commonly used by Dealers and Jobbers when measuring a belt.

Tri-Power® Belts

Listed by Number

Showing Tri-Power® Belts with Corresponding Top Widths and Outside Lengths

PLEASE NOTE: V-Belt drives which use the belt as a clutch requires special consideration because the heat generated by belt slip (during engagement and disengagement) on some clutching applications can cause the V-Belt tensile materials in the belts listed below to shrink in length. The shrinkage may cause a belt, which is already engaged and driving, to not de-clutch, or a de-clutched belt may engage itself and start driving the machine unexpectedly. Depending on the machine and circumstances, either situation could prove dangerous to the machine operator or bystanders.

Belts especially designed to minimize or eliminate heat shrinkage may be required.

IMPORTANT: The outside length is determined by placing a steel tape around the outside of the belt. This method should be used because it is the one most commonly used by Dealers and Jobbers when measuring a belt.

Truflex® and PoweRated® Belt Dimensions

Showing Nominal Belt Top Widths and Outside Lengths with Corresponding Gates Belt Numbers

Both Truflex® and PoweRated® belts are listed for your convenience. Standard series Truflex® V-Belts are available in four different sizes: the "0000" series, "1000" series, "2000" series and "3000" series V-Belts. The second and third digits in a standard series belt number indicates the outside circumference of the belt, in inches and the fourth digit indicates additional tenths of an inch of belt length, if any.

IMPORTANT: The top width shown is the width obtained by placing a steel tape across the top of the belt. The outside length is determined by placing a steel tape around the outside of the belt. These methods have been used because they are the ones most commonly used by Dealers and Jobbers when measuring a belt.

Length In Inches	Truflex® Belt No.	PoweRated® Belt No.	Length In Inches	Truflex® Belt No.	PoweRated® Belt No.	Length In Inches	Truflex® Belt No.	PoweRated® Belt No.
